

Jacob Bolden

Front-end web developer focusing on building web accessible applications

Experience

Intern • Methodist University Hospital

Aug 2020 - Dec 2020

- **Identified and presented potential risks and inconsistencies in the database through clear and concise visual aids during meetings**
- Improved daily efficiency by streamlining the process of populating tables in Microsoft Excel
- Analyzed data and results from previous quarters and other institutions to identify trends or areas for improvement

Notable Projects

Orgame • Dec 2022

Developed a web application using Next, Prisma, and PostgreSQL that allows users to create would you rather questions and vote on them

Pokefolder • Aug 2022 - Nov 2020

Designed and implemented an advanced Pokémon card search engine that allows users to easily locate cards and view their prices and details.
